

# Soaped Bathing Sponges

Our single-use soaped bathing sponges were originally designed primarily for bedridden patients or when a long shelf life was required. Today, they are used in home care, hospitals, nursing homes - and found on retailers' shelves.

Just add water to activate the soap on this convenient, all-in-one product. Soaped bathing sponges can be impregnated with almost any type of soap, making them suitable for general hygiene.

All-in-one

Gentle on the skin

All-around saving

pH balanced

Long shelf life

Ideal for travel

# Soaped Bathing Sponges
