MORE ENERGY, HIGHER PERFORMANCE, INCREASED CONCENTRATION AND FASTER RECOVERY— WHO WOULD NOT WANT THAT?

Whether in sports, professional life or leisure time, with the **Powerinsole®** active it is possible! And in the meantime, doctors, physiotherapists, leisure and professional sportsmen and many others have been persuaded about it. It is reflected in the volume of positive feedback:

- ☞ reduced muscle stiffness
- ☞ adhesions and cramps
- ☞ greater endurance
- ☞ less tiredness
- ☞ higher concentration
- ☞ less pain after injuries

The flexible and durable polyester fabric is characterized by the perfect wearing comfort and the highest hygienic requirements

Thanks to the ergonomic and very flat shape (approx. 2 mm thickness), the **Powerinsole®** can be used by everyone regardless of the type and size of the shoe

The therefore developed powerchip is the heart piece of the **Powerinsole®**

ISO 9001 certified production

The active gel is distinguished by its outstanding reset property and skin compatibility as well as the unique adhesive properties

POWERINSOLE® INNOVATIVE AND GLOBALLY UNIQUE

The **Powerinsole®** is an innovative and globally unique product. Embedded in an active gel cushion, the **Powerinsole®**'s core - the powerchip - stores a specially developed program with specifically fine-tuned information which is transmitted to the body over a newly developed system.

This program supports the human body by helping it to function more efficiently at cell level and demonstrably improving blood circulation, thus allowing faster oxygenation and pulse rate reduction.

The **Powerinsole®** contributes to a faster recovery which means: reduced muscle stiffness, adhesions and cramps. Furthermore, one experiences greater endurance, less tiredness, higher concentration and less pain after injuries.

The **Powerinsole®** enhances one's well-being not only during sports but also during work and leisure time activities. Thanks to its simple application, the Powerinsole may be used by anyone! Simply place it inside your shoe and the effect on your body is produced immediately.

The **Powerinsole®** can be used flexibly, in sports shoes, as well as work or leisure shoes.

And there is another advantage: thanks to a special active gel, you can switch it from one shoe to another. The adhesive area can be easily rinsed with water whenever needed and then it will adhere again.

The **Powerinsole®** is „made in Germany“ and available at our partner stores or directly at www.powerinsole.com.
