

# home guardian<sup>.AI</sup>

HomeGuardian.ai is a patented, world first, artificial intelligence driven fall detection and behavioural analysis device.

It is the only technology in the world that enables next-generation care, while being 100% private and secure by processing all alerts on the device itself, maintaining the users privacy and dignity.

Designed with the elderly, disabled and their providers in mind, our unique "plug in and go" design allows for the simple implementation and extremely high levels of technology acceptance amongst its users.

HomeGuardian is perfect for home, residential aged care, in home care, hospitals and more.

# Residential Aged Care

HOMEGUARDIAN.AI

HomeGuardian allows residential aged care facilities to provide a higher level of care to its residents than has ever been possible before.

- Ease of installation - no cabling, network, or expensive installation required
- Dramatically improve the level of care and response time to incidents, improving staff efficiency and overall accountability
- Detect and prevent falls, abuse, OH&S issues
- Collect behavioural analytics data over the long term
- Reduce admin overhead through automated reporting and business intelligence
- Maintain residents privacy and dignity - can be used in bedrooms, bathrooms, common areas and more
- Receive alerts through your existing nurse call system, our browser-based facility manager, smartphone app, SMS and more
- Completely open API's allow you to compile reports and export data into business intelligence applications

# In-Home Care

HOMEGUARDIAN.AI

HomeGuardian enables those being cared for in their own home, better than humanly possible care, 24x7, 365 days a year.

- HomeGuardian can be used in any room in the house - simply plug into power and connect to WiFi, no professional installation required
- HomeGuardian's patented artificial intelligence can alert carers, loved ones, neighbours - or all of the above, with automatic escalation
- Designed specifically to make elderly people or those living with a disability, feel comfortable having it in their home
- Maintain users privacy and dignity - can be used in bedrooms, bathrooms, living rooms and more
- Maintain independence, allowing people to live in their own home for longer
- Extremely affordable and easy to use
- Fully funded through HCP, CHSP and the NDIS!

# Our Patented AI Technology

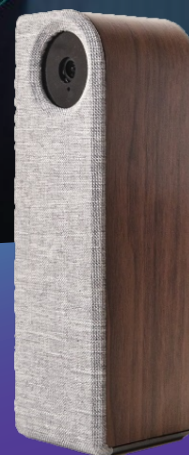

HOME GUARDIAN.AI

HomeGuardian is a world first, quantum leap in how we care for our most vulnerable. By combining cutting edge artificial intelligence with an array of visual and audio sensors, we combine the best of CCTV and Security Cameras, IoT Care Sensors, next generation healthcare sensors, and more into one single device.

This allows you to have peace of mind that the people it cares for are not only receiving the highest level of care IN THE WORLD, but they maintain their privacy, dignity and independence.

HomeGuardian.ai allows you to not only respond faster than ever before to acute incidents, by utilising real world behavioural analysis, our AI enables early detection in declines in health, allowing carers to predict and then prevent incidents.

Your care organisation can be a world leader, with HomeGuardian.ai.
